Key Features

- **Transfer** VHS tapes into high quality duplicates
- **Crystal** clear picture quality
- **Edit** footage by adding music or headings
- **Follow** easy and straightforward instructions
- **Robust** and elegant aluminium case

Turn classic footage into something exciting

Gone are the days when transferring your VHS tapes into duplicates resulted in low quality footage, with the Directors Cut SCART this is made simple and to top it off, you can enjoy top quality, crystal clear images, images you can enjoy for years to come.

It doesn't get much easier than this, just plug the Directors Cut into the VCR and then the FireWire cable into your computer and away you go.

Once you've captured your footage, edit it and add music or headings with iMovie or another DV application of your choice. Turn classic footage into something extraordinary - the possibilities are endless. You can now guarantee that memorable moments are stored safely on DVD.

Easy Connection

How often have we dreamt of a product that is simple to install and fun to use?

Is this asking too much?... Well maybe not, because the Directors Cut SCART does all that and much more!

Its plug and play feature allows you to do just that. Plug in the FireWire cable to your computer and the SCART cable to the VCR and that's it.

It really does do what it says on the box.

Perfect image quality

Provided that the original image quality is good, Directors Cut will convert it into a digital video stream. The captured video will maintain its high level of quality for many years to come.

Director's Cut converts your analogue footage into the DV-25 format, used in digital camcorders.

Play around with it

The Directors Cut is compatible with a wide range of video editing packages, for instance iMovie HD, Final Cut Express & Pro and many many more. There are no restrictions to what you can do, edit your movie to keep the best bits, add transitions and titles - the possibilities are endless.

Export Video

Once you have captured and edited your footage, you can either burn it to a DVD or export it back to a VHS tape. You can also use Director's Cut as a monitoring tool to preview video in real time on a TV or monitor while you edit it with imovie or Final Cut.

Robust Aluminium case

Beautifully crafted in aluminium, the case is built to an extremely high quality. This robust case protects against any possible shocks and on top of that it actually looks good.
