

MiniBank MT-II

FireWire & USB 2.0 Enclosure for 2.5" Hard Drives

If portability and data exchange are your main concerns, MiniBank MT-II is the answer.

Available as an empty (MT) case, MiniBank allows you to install a 2.5" IDE hard drive of any brand, size or speed.

MiniBank MT-II features not only an Oxford 911 chipset, for amazing transfer rates via FireWire, but also a USB 2.0 port for a universal use. You can connect MiniBank MT-II to virtually any computer that has either FireWire, USB 1.1 or USB 2.0 support. Wherever you are, your files will always be easily accessible.

MiniBank MT-II has a solid painted aluminium case that gives the best possible protection to your hard drive and stored documents. An ideal travel companion!

FireWire - USB 2.0

Also known as FireWire or iLink, IEEE 1394 is the established high-speed interface standard for digital video. Over the years, FireWire has also become a great alternative for external storage devices that require high data throughput.

USB 2.0, although not as fast as FireWire for external storage devices, is becoming increasingly popular on Windows systems, as XP now natively supports this interface.

Mac Compatibility

- PowerMac with FireWire or USB connectivity
- Mac OS 9.1+
- Mac OS X

Windows Compatibility

- Windows PC with FireWire/IEEE 1394/iLink or USB 1.1/USB 2.0 connectivity
- Windows 98SE, Me, 2000, XP

Key Features

External hard drive enclosure allowing you to install a 2.5" ATA hard drive. Install a standard 2.5" ATA hard drive to expand your external storage capacity. Most modern drives are compatible with MiniBank MT-II.

Easy access and **high quality aluminium case** to allow fast and troublefree installation of a hard drive.

MiniBank MT-II has a user-friendly case making the installation of hard drives quick and easy. Designed by the engineering team of Miglia and made in Europe.

Ideal "Data to Go" solution - transfer large files from one location to another. The small form factor of MiniBank MT-II allows you to easily carry it from one location to another. With MiniBank, you will always have your files handy.

Bootable via FireWire on recent PowerMacs - Bus powered via FireWire ports!

MiniBank is bootable on PowerMacs G4/G5, recent iMacs, iBooks and PowerBooks. Simply install a system folder, OS 9 or OS X, select it as a startup disk and you're ready. No external power supply is required as MiniBank is powered by the FireWire bus.

Fully compliant with Kensington's K & Lock specification for maximum security. You can easily secure your MiniBank with a Kensington cable, the industry standard for anti-theft protection.

MiniBank MT-II

FireWire & USB 2.0 Enclosure for 2.5" Hard Drives

STORAGE

Portable Storage

With onboard FireWire and USB 2.0 connectivity, MiniBank MT-II can be connected to virtually any computer. The solid aluminium case offers a high level of protection to your drive, a major advantage if you are travelling. As with all Miglia products, everything you need to connect up your unit to your computer is provided.

Keep it safe!

MiniBank MT-II closely follows the standards set by Kensington for the K & Lock system, the industry leading anti-theft mechanism for IT equipment. Simply connect your K & Lock to the back of MiniBank and it will be safe.

Technical Data

- ✓ External FireWire and USB 2.0 hard drive enclosure allowing you to install one 2.5" ATA hard drive
- ✓ Unit weight: 275 Gr (without drive)
- ✓ W: 90mm, L: 155mm, H: 25mm
- ✓ One FireWire port
- ✓ One USB 2.0 port, backwards compatible to USB 1.1 host ports
- ✓ Oxford 911 based bridge board
- ✓ Bus Powered through FireWire port
- ✓ CE and FCC approved
- ✓ 2 years limited warranty

USB 2.0 or FireWire?

MiniBank MT-II features a FireWire 400 Mb/sec port as well as a USB 2.0 480 Mb/sec port. FireWire has an edge over USB 2.0 in terms of transfer speed, but USB 2.0's major advantage lies in its backward compatibility with existing USB 1.1 host cards, which you will find on virtually any recent computer. A handy feature when travelling between locations. FireWire is natively supported by Mac OS 9 and X, Win98SE and higher. USB 2.0 is natively supported by Windows XP

What's in the box?

- ✓ MiniBank MT-II hard drive case
- ✓ External power supply (depending on chosen configuration).
- ✓ 6/6 pin FireWire Cable
- ✓ USB cable
- ✓ Illustrated installation guide

Built by Miglia Technology

When designing MiniBank MT-II, Miglia did not choose the easy and low-quality route of plastics. The case is made out of 1.8mm thick aluminium and the 5 mm front plate is machine-milled out of a solid bloc of aluminium. Metal confers better protection and much greater lifespan than plastic.

Product Codes

MiniBank MT-II	MI-MB31
with Euro power supply	MI-MB31PSE
with UK power supply	MI-MB31PSUK
w/ US power supply	MI-MB31PSUS
w/ Australian power supply	MI-MB31PSAU

The cost of using metal instead of plastic might not be the same, but how much is the data contained on your drive really worth?
